ELF Day Success in Finland

Published on Fri, 2016-06-10 15:22

Members of the European Location Framework (ELF) Project were delighted to take part in Finland's recent ELF Day.

This special one-day event, on 8 June, was organised in collaboration with the National Land Survey (NLS) of Finland.

As well as presenting some of the results from the Project, it was a great opportunity to find out what the European Location Framework will offer, learn more about the business model and try the services during a hands-on session.

Participants heard from Arvo Kokkonen, Head of NLS as well as ELF Technical Coordinator, Antti Jakobsson from NLS, Abigail Page from EuroGeographics and Sanna Paavilainen from ESRI Finland.
